Clarissa Morgan

559-423-3978 | chloesmorgan14@gmail.com | linkedin.com/in/clarissa-morgan | github.com/oksai7

Education

California State University, Fresno — Fresno, CA
Bachelor of Science in Computer Engineering — *Aug. 2024 – May 2028*

Lemoore College & Lemoore Middle College High School — Lemoore, CA
Associate's in Science and Mathematics, Associate's in Arts and Humanities, & Diploma — *Aug. 2020 – May 2024*

Experience

Computer Engineering Intern — May 2026 – Aug. 2026
Intel Corporation — *Hillsboro, OR*

- Developed a full-stack system for AI analysis, risk analysis, prediction, and automated insights of Intel data using Intel's internal AI system, Python, SQL, OAuth2, JMT framework, an LLM Gateway, PyUber, SSL verification, Polars dataframes,and Intel's internal DB and DBMS. All data is kept securely inside of Intel's systems throughout the entire process. Usable with any dataset and is entirely customizable. Reduces weekly workload by 75%.
- Developed a full-stack webpage using ScriptHost, PowerBI, TOAD DataPoint, and Docker to analyze and provide actionable insights for tool inventory data. Reduces weekly workload by seven hours.
- Developed a Mass Ping Fab Host Utility with FQDN to IP conversion and optional parallel processing capabilities. Reduces weekly workload by 2 hours.
- Explored and began implementing MCP as the next step for future development of the AI Analytics system.
- Explored RAG capabilities and documented the procedure for utilizing RAG with Intel's internal AI tools. Once complete, this allows for Intel employees to create their own RAG systems for any dataset. Useful for searching through an individual's lengthy and cluttered documentation to quickly find information.

Automotive Ethernet Research Assistant — Jan. 2026 – Present
California State University, Fresno — *Fresno, CA*

- Communicate with managers to set up campus computers used on campus
- Assess and troubleshoot computer problems brought by students, faculty and staff
- Maintain upkeep of computers, classroom equipment, and 200 printers across campus

Artificial Intelligence Research Assistant — May 2025 – July 2025
California State University, Fresno — *Fresno, CA*

- Explored methods to generate video game dungeons based off of *The Legend of Zelda*
- Developed a game in Java to test the generated dungeons
- Contributed 50K+ lines of code to an established codebase via Git
- Conducted a human subject study to determine which video game dungeon generation technique is enjoyable
- Wrote an 8-page paper and gave multiple presentations on-campus
- Presented virtually to the World Conference on Computational Intelligence

Projects

Analysis of the Exploitations of Minecraft Server Vulnerabilities | *nginx, OracleVM, hping3, Minecraft Java Edition*Jan

- Developed a full-stack web application using with Flask serving a REST API with React as the frontend
- Implemented GitHub OAuth to get data from user's repositories
- Visualized GitHub data to show collaboration
- Used Celery and Redis for asynchronous tasks

Hybrid Counting Sort with Frequency Counting using a Balanced BST | *C++* — Feb. 2026 – May 2026

- Developed an original hybridized sorting algorithm with a time complexity of O(n) with the possibility of a less-than-linear space complexity.
- Implemented the new algorithm using C++ and VS Code.

Technical Skills

Languages: C++, ARM, Python, C/C++, SQL (Postgres), DAX, Verilog
Frameworks: React, Node.js, Flask, JUnit, WordPress, Material-UI, FastAPI
Developer Tools: cnvrg.io, Git, Jupyter, Docker, TravisCI, Google Cloud Platform, VS Code, TOAD DataPoint, PowerBI, IntelliJ,
Libraries: pandas, NumPy, Matplotlib, nholmann/json
